

## AKLIMDA!

Bir toplama işleminde aynı basamaktaki sayıların toplamı 9'u geçerse bu toplama işlemine eldeli toplama işlemi denir.

Birlikler toplandığında elde varsa onluklara, onluklar toplandığında elde varsa yüzöklere eklenir.

Aşağıdaki toplama işlemlerini örnekteki gibi yapalım.

$\begin{array}{r} \text{OO} \\ 468 \\ + 337 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 275 \\ + 146 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 176 \\ + 334 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 559 \\ + 273 \\ \hline \end{array}$
$\begin{array}{r} \text{OO} \\ 384 \\ + 286 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 396 \\ + 325 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 517 \\ + 186 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 688 \\ + 242 \\ \hline \end{array}$
$\begin{array}{r} \text{OO} \\ 347 \\ + 266 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 456 \\ + 256 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 461 \\ + 249 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 638 \\ + 173 \\ \hline \end{array}$
$\begin{array}{r} \text{OO} \\ 294 \\ + 287 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 235 \\ + 386 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 458 \\ + 262 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 767 \\ + 138 \\ \hline \end{array}$
$\begin{array}{r} \text{OO} \\ 494 \\ + 167 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 448 \\ + 367 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 251 \\ + 479 \\ \hline \end{array}$	$\begin{array}{r} \text{OO} \\ 195 \\ + 195 \\ \hline \end{array}$

Aşağıdaki eldeli toplama işlemlerini yapalım, toplamların okunuşlarını yazalım.
